SUMMARY

An aspiring Software Engineering professional with a strong academic foundation and hands-on experience moving fluidly from system requirements and UI/UX design to robust web and mobile production. Built and shipped feature-rich Android platforms using Kotlin (Jetpack Compose) and modern full-stack web applications using Laravel. Proven track record in project-based learning (PBL) environments, leading frontend and AI workflow integrations, and delivering an award-winning data analytics platform (1st Place PBL Expo 2024). Seeking opportunities to engineer scalable software solutions globally.

WHAT I BRING

Design to Implementation: Translate complex user workflows and Figma prototypes into responsive, modular code bases in both mobile and web environments.

Full-Stack Capability: Architect secure backend services (Laravel, REST APIs) paired with efficient database management (MySQL) and clean user interfaces.

Agile Collaboration: Deliver high-quality engineering products within cross-functional teams, ensuring seamless API contracts and data synchronization.

CORE SKILLS

Software Engineering Domains: Mobile App Development, Full-Stack Web Development, RESTful API Integration, UI/UX Design, System Analysis, OCR & Automation Workflow, Object-Detection Client Integration

Frameworks & Libraries: Laravel, Jetpack Compose, Tailwind CSS, Bootstrap, Retrofit, D3.js

Databases & Tools: MySQL, Android Studio, Visual Studio Code, Postman, Git, Figma, Arduino IDE

Languages: Kotlin (proficient), PHP, JavaScript, Python, SQL, Indonesian (native), English

EXPERIENCE

Homi – Housing Management System | Team Member

Aug 2025 – Present | Batam, Indonesia

- Developed a comprehensive housing management platform using Laravel, MySQL, and REST APIs to streamline resident administration, announcements, service requests, complaints, and monthly fee management.
- Engineered and integrated robust backend architectures with mobile and admin dashboard workflows, focusing on secure authentication, efficient data management, and thorough API testing using Postman.
- Designed a PDF-based submission letter generation feature and implemented an OCR-based payment verification system, reducing manual validation and accelerating the verification process by up to 40%.

Lumina – AI Pothole Detection System | AI & Frontend Developer

Feb 2024 – June 2025 | Batam, Indonesia

- Built a responsive mobile-based pothole reporting system using Kotlin, Laravel, and MySQL to facilitate crowdsourced road damage tracking.
- Integrated YOLO-based image detection models into the mobile interface to support accurate, real-time road damage identification during live field testing.
- Designed and mapped user workflows and front-end interfaces to ensure intuitive reporting, monitoring, and management of detection analytics.

AGRIFUTURE – Agricultural Learning Platform | Android Developer

Sep 2024 – Jan 2025 | Batam, Indonesia

- Developed an Android-based agricultural learning application that provides localized training materials, live mentoring modules, and farming guidance for youth and beginner farmers.
- Implemented modular mobile features using Kotlin, Jetpack Compose, Retrofit, and REST API integrations, focusing on responsive UI performance and user-centric flows.
- Partnered with backend developers to align API contracts, ensuring seamless communication and data synchronization between web services and the mobile application.

Clarity – Interactive Data Visualization Platform | Full-Stack Web Developer

Feb 2024 – Jul 2024 | Batam, Indonesia

- Developed a web-based data visualization platform that transformed complex International Office activity logs into interactive dashboards for optimized analysis and reporting.
- Built and deployed application features utilizing a modern tech stack consisting of Laravel, MySQL, Bootstrap, JavaScript, and D3.js.
- Collaborated effectively within a 6-member engineering team to deliver the high-quality product, which successfully secured 1st Place at the PBL Expo 2024.

EDUCATION

Batam State Polytechnic

Bachelor of Applied Science in Software Engineering Technology | GPA: 3.81 / 4.00

Aug 2023 – Present | Batam, Indonesia

- *Key Focus Areas:* Android Mobile Development, Web Engineering, Database Design, System Analysis, Software Project Management.

AWARDS & CERTIFICATIONS

- 1st Place Winner – PBL Expo 2024, awarded for *Clarity: Interactive Data Analytics System*.
- MSIB Batch 7 – Android Mobile Development & UI/UX Design, Infinite Learning (2024).
